Rigging Services

Working with our rigging service partner, **UK Rigging**, ACC Liverpool's in-house production team offer a full range of specialised rigging services facilitating everything from exhibition signage to full production rigging.

The team have access to a wide range of rigging equipment at competitive prices. You will be allocated a dedicated Production Manager who will be your main point of contact for rigging information and quotations throughout your event. If you are unsure who your Production department contact is for your event then please get in touch with us using the contact details below.

The attached price list provides guidance on costs for rigging services, and a bespoke quote will be issued on receipt of a full rigging plan (required at least 2 weeks before the event) that contains all of the required rigging point positions along with detailed and accurate weight loadings and truss specifications.

Submission of plans and other required information later than 7 working days prior to event start will incur a late order surcharge. CAD drawings of both Hall 2 and the Arena can be supplied on request.
